# SANJAY BOLLINI

(817) 832-3333 • sbollini06@gmail.com • LinkedIn • GitHub • zing302.github.io/sanjay-bollini

## EDUCATION

**University of Washington** Sep 2025 – Jun 2028
*B.S. Computer Science | Minor: Applied Mathematics | GPA: 3.75 | Dean's List* Seattle, WA
**Coursework:** CSE 351: Computer Systems • CSE 391: Software Tools (Linux & Git) • CSE 311: Foundations of Computing • AMATH 352: Numerical Linear Algebra • MATH 126: Multivariable Calculus
**Certifications:** Claude with the Anthropic API — Anthropic (Apr 2026) • Multi-Agent Systems — Google • AWS Cloud Essentials

## TECHNICAL SKILLS

**Languages:** Python, TypeScript, JavaScript, Java, C, SQL, HTML/CSS, Bash
**Stack:** Next.js, Vue.js, FastAPI, Node.js, PostgreSQL, REST APIs, AWS, Git, Linux
**AI-Native:** Claude Code, Claude API (Haiku/Sonnet), MCP servers/CLAUDE.md, multi-agent systems, prompt engineering, GitHub Copilot
**Shipping:** Vitest, Playwright E2E, Zod, TDD, CI/CD concepts, technical documentation, agile

## PROJECTS

**BillPilot AI** 2026
*Next.js 15, TypeScript, Claude API, PostgreSQL | Submitted: OpenAI × Handshake Codex Creator Challenge*

- Independently designed and shipped a full-stack AI medical billing assistant — REST API, TypeScript frontend, PostgreSQL backend, and multi-step agentic pipeline (document ingestion → LLM extraction → schema-enforced output → user review). Built AI-natively with Claude Code; authored CLAUDE.md skill files and MCP connectors throughout.
- Production-ready: Zod schema validation, Vitest unit tests, Playwright E2E — 0 to deployed without a team.

**AI Market Intelligence System** 2025–2026
*Python, PostgreSQL, Claude Haiku/Sonnet, yfinance, cron | github.com/Zing302/ai-market-intel*

- Built from scratch: 4-agent LLM orchestration system (Analyst, Researcher, Trader, Manager) running 3x/day on 20 symbols — ingests SEC 8-K filings, 800+ daily headlines, and real-time prices into a production PostgreSQL schema. Designed every layer independently: data ingestion, agent architecture, guard model, and reporting.
- 141 unit tests, 7 cron-scheduled jobs, per-source circuit breakers, and 7-day outcome backfill scoring accuracy. Fully automated — no manual intervention ever needed.

**Quantum Password Generator** 2025
*Python, FastAPI, Qiskit, IBM Qiskit Aer, HTML | github.com/Zing302/quantum-password-generator*

- Quantum-mechanical true-random password generator using Hadamard gates and measurement collapse. FastAPI backend + HTML frontend — full-stack, solo-built, deployable on real IBM quantum hardware.

**Mindfulness4Success** 2023
*Vue.js, JavaScript | mindfulness4success.com*

- Built and launched a wellness web app solo at 16 — presented at the Youth Entrepreneur Summit, donated proceeds to Carroll ISD CS Honor Society. Live since 2023.

## EXPERIENCE

**Cloud Girl** Jun 2026 – Sep 2026
*AI Developer Advocate Intern* Remote

- Building AI-powered demos and developer tools using MCP (Model Context Protocol), Claude Code, and CLAUDE.md skill files — working directly with Priyanka Vergadia (Google Cloud Developer Advocate) to showcase AI-native development workflows.

**Alliance Endocrinology** Feb 2020 – Present
*IT Manager* Fort Worth, TX

- Running IT solo for a medical clinic since age 14 — own every layer: network infrastructure, endpoint security (Sophos), EHR systems (EClinicalWorks), HIPAA compliance, device management, and vendor relationships. No support team, no escalation path.
- Designed and maintained clinic website (HTML/CSS); implemented SEO and Google Ads strategy that measurably improved patient acquisition.

**Mouri Tech** Jul 2024 – May 2025
*Data Engineering Intern* Irving,TX

- Built SQL analytics pipelines across full SDLC — schema design, query optimization, testing, and delivery. First professional engineering environment.

## RESEARCH

**UT Dallas — Software Testing & Analysis Lab** Jun – Aug 2024
*ML & Formal Verification Research Intern* Dallas, TX

- Integrated ML into static analysis tools (JayHorn, JBMC, CBMC) to automate Java program verification; designed variance analysis pipelines and presented at a lab research showcase.

**UW Machine Learning Research Club** Sep 2025 – Present
*Spiking Neural Networks Researcher* Seattle, WA

- Collaborating on bio-inspired SNN architectures for energy-efficient, low-latency inference — applying neuromorphic computing principles to real-world ML deployment.
